Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 28, 2005 has been entered.

It is noted that applicant has indicated on page 4 of the response that claims 11-18, 20 and 71 are pending. However, the listing of the claims shows claim 20 as being canceled. The listing of the claims is deemed to indicate the correct status of the claims and claim 20 is therefore deemed to be canceled.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the prior art fails to disclose the particular probe having proximal and distal end portions, with an ultrasound transducer located between the proximal and distal ends and adapted to deliver energy through the outer surface of the probe, and a threadform extending from the outer surface as set forth in the claims. Applicant's arguments submitted with the September 28, 2005 response are deemed persuasive. In particular, Dobak, III et al discloses a helical portion surrounding a straight tube and fails to disclose the threadform extending from an outer surface of a longitudinal portion housing an ultrasonic transducer as set forth in the claims. While Knowlton disclose the use of

ultrasonic transducers to heat fluid in a balloon, the Dobak, III embodiments including the threaded/helical surface are used to transfer heat to the blood and there would be no motivation to provide the heating transducers taught by Knowlton in such a device. It is noted the Fogarty et al (4,762,130) device most closely resembles applicant's device. However, Fogarty et al provide the heating/cooling fluid through the helical balloon and there is no suggestion of providing an ultrasonic transducer on the catheter portion (i.e. longitudinal portion) as recited in applicant's claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Peffley whose telephone number is (571) 272-4770. The examiner can normally be reached on Mon-Fri from 6am-3pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda Dvorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
